In This Issue ....................................................... 1213

Meet the First Authors ........................................... 1214

Editorials

A New Conserved Player in Lymphatic Morphogenesis
Nathan D. Lawson ................................................. 1216

Does Endothelium Buffer Fat?
Ayon Ibrahim, Zolt Arany ......................................... 1219

Synthetic MicroRNAs Stimulate Cardiac Repair
Lior Zangi, Roger J. Hajjar ......................................... 1222

3-Dimensionally Printed, Native-Like Scaffolds for Myocardial Tissue Engineering
Alexa Wnorowski, Joseph C. Wu .............................. 1224

Getting A Leg Up on Cell Therapy for Critical Limb Ischemia
S. Keisin Wang, Michael P. Murphy ........................... 1227

Commentaries on Cutting Edge Science

Spermidine Promotes Cardioprotective Autophagy
Dan Tong, Joseph A. Hill .......................................... 1229

Trainee and Young Investigator Corner

The Challenge of Mentorship
Sarah M. Schumacher .............................................. 1232

Viewpoints

Beyond Mitophagy: The Diversity and Complexity of Parkin Function
Sarah E. Shires, Richard N. Kitsis, Åsa B. Gustafsson ....... 1234

Proliferative Versus Degenerative Paradigms in Pulmonary Arterial Hypertension: Have We Put the Cart Before the Horse?
Ketul R. Chaudhary, Mohamad Taha, Virgilio J.J. Cadete, Rafael S. Godoy, Duncan J. Stewart .................................. 1237

CIRCULATION RESEARCH (ISSN 0009-7330 print / 1524-4571 online) is published semimonthly for 24 total issues a year by Wolters Kluwer Health, Inc. at 14700 Citicorp Drive, Bldg 3, Hagerstown, MD 21742. Business offices are located at Two Commerce Square, 2001 Market Street, Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. AHA members will have online access to the journal as a benefit of membership. In the US, individuals may subscribe in print for their personal use at the annual rate of $749 for nonmembers. International: $888 for nonmembers. Online-only and other additional rates can be found online at http://lww.com/circres. AHA membership information can be found online at professional.heart.org. Postmaster: Send address changes to Circulation Research, American Heart Association, Wolters Kluwer Health, Inc., PO Box 1550, Hagerstown, MD 21740.
Rigor and Reproducibility in Analysis of Vascular Calcification
Linda L. Demer, Yin Tintut, Kim-Lien Nguyen, Tzung Hsiai, Jason T. Lee 1240

Why Don’t We Have Proven Treatments for HFpEF?
Jason Roh, Nicholas Houstis, Anthony Rosenzweig 1243

Molecular Medicine
Activated TAFI Promotes the Development of Chronic Thromboembolic Pulmonary Hypertension: A Possible Novel Therapeutic Target

Cellular Biology
An Evolutionarily Conserved Role for Polydom/Svep1 During Lymphatic Vessel Formation
Terhi Karpanen, Yvonne Padberg, Serge A. van de Pavert, Cathrin Dierkes, Nanami Morooka, Josi Peterson-Maduro, Glenn van de Hoek, Max Adrian, Naoki Mochizuki, Kiyotoshi Sekiguchi, Friedemann Kiefer, Dörte Schulte, Stefan Schulte-Merker 1263

Polydom Is an Extracellular Matrix Protein Involved in Lymphatic Vessel Remodeling
Nanami Morooka, Sugiko Futaki, Ryoko Sato-Nishiuchi, Masafumi Nishino, Yuta Totani, Chisei Shimono, Itsuko Nishino, Kiyotoshi Sekiguchi 1276

Lipid Droplet Biogenesis and Function in the Endothelium
Andrew Kuo, Monica Y. Lee, William C. Sessa 1289

Integrative Physiology
★ Single-Dose Intracardiac Injection of Pro-Regenerative MicroRNAs Improves Cardiac Function After Myocardial Infarction
Pierluigi Lesizza, Giulia Prosdocimo, Valentina Martinelli, Gianfranco Sinagra, Serena Zacchigna, Mauro Giacca 1298

★ Adrenergic Signaling Strengthens Cardiac Myocyte Cohesion
Camilla Schinner, Franziska Vielmuth, Vera Rötzer, Matthias Hiermaier, Martiya Y. Radeva, Thu Kim Co, Eva Hartlieb, Andreas Schmidt, Axel Imhof, Ahmed Messoudi, Anja Horn, Angela Schlipp, Volker Spindler, Jens Waschke 1305

★ Myocardial Tissue Engineering With Cells Derived From Human-Induced Pluripotent Stem Cells and a Native-Like, High-Resolution, 3-Dimensionally Printed Scaffold
Ling Gao, Molly E. Kupfer, Jangwook P. Jung, Libang Yang, Patrick Zhang, Yong Da Sie, Quyen Tran, Visar Ajeti, Brian T. Freeman, Vladimir G. Fast, Paul J. Campagnola, Brenda M. Ogle, Jianyi Zhang 1318

Clinical Track
★ Autologous Cell Therapy for Peripheral Arterial Disease: Systematic Review and Meta-Analysis of Randomized, Nonrandomized, and Noncontrolled Studies
Mauro Rigato, Matteo Monami, Gian Paolo Fadini 1326
Reviews

Bioresorbable Scaffold: The Emerging Reality and Future Directions
Yohei Sotomi, Yoshinobu Onuma, Carlos Collet, Erhan Tenekcioglu, Renu Virmani, Neal S. Kleiman, Patrick W. Serruys .................................................. 1341

Cell Therapy Trials in Congenital Heart Disease
Hidemasa Oh ................................................................. 1353

Corrections

Correction to: Identification of a Retinal Aldosterone System and the Protective Effects of Mineralocorticoid Receptor Antagonism on Retinal Vascular Pathology [Online Only] .................................................. e31

Correction to: β-Adrenergic Signaling Inhibits Gq-Dependent Protein Kinase D Activation by Preventing Protein Kinase D Translocation and Multimodal SHG-2PF Imaging of Microdomain Ca2+-Contraction Coupling in Live Cardiac Myocytes [Online Only] .................... e32

In February 2017, the average time from submission to first decision for all original research papers submitted to Circulation Research was 15.4 days.

On the Cover: Autofluorescence images obtained via 2-photon microscopy on day 7 indicated that the cells had aligned with the channels of the fabricated scaffold. Nuclei were stained with DAPI (scale bar=20 μm). See related article, page 1318.
